

# GREEN JOB PANEL

Tuesday, December 1

7:00 to 8:30 PM

Pogue Student Center—Multipurpose A

A **green job**, also called a **green-collar job** is, according to the United Nations Environment Program, "work in agricultural, manufacturing, research and development (R&D), administrative, and service activities that contribute(s) substantially to preserving or restoring environmental quality.

Specifically, but not exclusively, this includes jobs that help to protect ecosystems and biodiversity; reduce energy, materials, and water consumption through high efficiency strategies; de-carbonize the economy; and minimize or altogether avoid generation of all forms of waste and pollution."

*"... now is the time for us to build a clean energy economy that will free ourselves from foreign oil and will generate new green jobs in the process."*

*"... more green jobs mean more money in the wallet of every American ..."*

*President Obama*

- ⇒ Who is hiring?
- ⇒ What kinds of jobs are out there?
- ⇒ How should I prepare?
- ⇒ How much money can I make?
- ⇒ Is this just a fad or will it last?
- ⇒ What degree program is best?
- ⇒ Are government jobs an option?

The green job panel will provide information on the experience and education needed to secure "green jobs" of the present and future. Hear this directly from the employers who will be doing the hiring!

Sponsored by S.E.E.D.  
Students of Edinboro for Environmental Defense
